Subject code & Name	:	CSE304 & Full Stack Development	Practical	:	4	Academic Year	:	2025-26

Task - 4

Aim

- Build a Node/Express backend for a Task Management system.
- Implement REST endpoints for creating, reading, updating, and deleting tasks (in-memory array, no database yet).
- Apply a request logging middleware that logs method, URL, and timestamp for every incoming request.
- Apply a global error handling middleware as the last middleware in the pipeline.
- Use correct HTTP status codes (200, 201, 404, 500) for each response.
