

Student ID:		24CS072	Student Name:		Patel Prince
Subject code & Name	:	CSE304 & Full Stack Development	Practical	:	3 Academic Year : 2025-26

Task - 3

Aim

- Integrate a public REST API (e.g., GitHub API) into the portfolio application to fetch and display a list of repositories dynamically.
- Use the Projects page built in Practical 2 as the integration point.
- Implement a loading spinner component shown while the request is in progress.
- Implement an error message component shown if the API call fails.
- Render at least the repository name and URL for each item returned.

Code

GitHub Link Repository Link:

Output

Folder Structure

This image shows the complete folder structure of the React project developed using Vite. It includes components, pages, assets, and configuration files organized in a modular and maintainable way.

Terminal

The screenshot shows a VS Code terminal window with the following commands and output:

```
PS C:\Users\Prince Patel\OneDrive\Desktop\LAB Submission\AWDF> npm run dev
PS C:\Users\Prince Patel\OneDrive\Desktop\LAB Submission\AWDF> cd Practical-3
PS C:\Users\Prince Patel\OneDrive\Desktop\LAB Submission\AWDF\Practical-3> npm run dev

> practical-3-repository-atlas@1.0.0 dev
> vite

10:22:48 pm [vite]      Re-optimizing dependencies because vite config has changed

VITE v8.2.2 ready in 233 ms

➔ Local:   http://localhost:5173/
➔ Network: use --host to expose
➔ press h + enter to show help
```

The terminal window has tabs for 'Output', 'Problems', 'Debug Console', 'Ports', and 'Terminal'. The 'Terminal' tab is active. On the right side of the terminal window, there are two tabs: 'node Practical-3' and 'powershell'. The 'node Practical-3' tab is active.
