## **Task - 1**

### **Aim**

- Create a React application using Vite for a student portfolio page.
- The application must include at least 4 reusable components: Header, About, Skills, and Footer.
- Each component must be independently structured and composed into a single-page layout.
- No logic or JSX should be duplicated across components.
- Props must be used to pass at least one piece of data into a minimum of 2 components.

## Output

### Student Portfolio

The output displays the student portfolio page containing the Header, About, Skills, and Footer components. All components are combined into a single-page layout using React.
